

Remote Injection Kits

For SuperDos and MiniDos Water-Driven Pumps

Hydro Systems offers remote injection kits for its SuperDos and MiniDos units. When highly aggressive chemicals are used in conjunction with a Hydro Systems water-driven pump, a remote injection kit might be required.

The purpose of the remote injection kit is to allow the chemical being dosed to by-pass the water-driven pump motor and be injected directly into the water line after it leaves the motor. Please contact the Hydro Systems Technical Support Team to understand when the remote injection kits should be used.

Example of Water-Driven Pumps Using Remote Injection

Example of Single Remote Injection Kit

Example of Dual Remote Injection Kit

Model Number	Description	Remote Injection Kit (Viton)	Remote Injection Kit (EPDM)	Remote Injection Description
HYD113202	SuperDos 15TF 2.5%	HYD012705	HYD012705E	SuperDos Dual Remote Injection Kit
HYD113203	SuperDos 15TF 5%	HYD012705	HYD012705E	SuperDos Dual Remote Injection Kit
HYD113205	SuperDos 20 2.5%	HYD012705	HYD012705E	SuperDos Dual Remote Injection Kit
HYD113206	SuperDos 20 5%	HYD012705	HYD012705E	SuperDos Dual Remote Injection Kit
